EDUCATION

BISHOP HEBER COLLEGE

MASTER OF COMPUTER

APPLICATIONS

Apr 2025 | CGPA: 8.46

BISHOP HEBER COLLEGE

BACHELOR OF COMPUTER

APPLICATIONS

Apr 2023 | CGPA: 8.49

CERTIFICATIONS

- **Microsoft and LinkedIn** - Build Your Generative AI Productive Skills
- **NPTEL, IIT Madras** - Programming, Data Structures and Algorithms using Python
- **Preplnsta** - Cloud Computing
- **LinkedIn Learning** - Full Stack Web Development With Flask, Prompt Engineering with Gemini
- **Meta** - Introduction to Databases for Back-End Development

SKILLS

LANGUAGES

- Python
- SQL
- HTML
- Javascript

CLOUD AND DEPLOYMENT

- Firebase
- Render
- GitHub

DATABASES

- MySQL
- MongoDB

FRAMEWORKS

- Django
- Flask
- Bootstrap

INTERESTS

- Prompt Engineering

INTERNSHIPS

TECHNOHACKS | WEB DEVELOPER

08.05.2024 - 07.06.2024

- Worked as a web developer intern for one month, where I was assigned to design and develop a responsive landing page.
- Used HTML Bootstrap to create an interactive and visually appealing user interface.
- Gained hands-on experience in frontend development, layout structuring, and enhancing user engagement through animation effects.

ILIFE TECHNOLOGIES | FULLSTACK DEVELOPER

01.06.2022 - 03.06.2022

- Completed a 3-day intensive hands-on internship on full stack development, gaining practical exposure to both frontend and backend technologies through guided training sessions and mini projects.

PROJECTS

PROGRAMMING EVENT HOSTING PLATFORM | [LINK](#)

Tech Stack: Django, MongoDB, CodeBERT

- Users register for coding events through the platform, attempt assigned problems, and submit their code online. Submissions are then evaluated using an AI model to assess accuracy and relevance, with results displayed on a real-time leaderboard accessible to both participants and organizers.
- Achieved improvement in event automation and code evaluation by developing a website integrated with **CodeBERT** for AI-driven code assessment.

JOB SEARCH PLATFORM | [LINK](#)

Tech Stack: Flask, MySQL, RESTful API

- Users access the portal to browse available job listings and apply directly through a simple form which is stored in the database, providing an organized and accessible way to manage job applications.
- It is a web-based platform integrated with **RESTful APIs** to enable seamless data communication and streamlined user interactions.

FINANCIAL TEXT SENTIMENT ANALYSER | [LINK](#)

Tech Stack: Flask, Huggingface API

- Built a web application that utilizes the **Hugging Face API** to perform real-time sentiment analysis on financial text, classifying it as positive, negative, or neutral.

RESPONSIBILITIES

EVENT HEAD, BOOTFETE2K25 DEBUGGING EVENT

Organized a competitive coding event with **50+** participants, encouraging collaboration and real-time problem solving.
